Airron kennedy Individual Project Deliverable Week 1 Created high concept for project Started 5 hours of code work on blueprint scripting to get an early start on a gameplay system. Week 2 Created prototype pitch : Prototype Pitch Understanding a Time based system when the player has to choose between upgrades or more time. To demonstrate a complex system with time being the currency, our team has decided to make an arena FPS which can be used to quickly test systems because of its rouge-like nature. This Time mechanics system will include 5 rounds of spawning enemies that give the player currency upon defeat, this currency can be used to either upgrade or save to receive more time to complete objectives. This fast paced mechanic will force players to choose between vital decisions that affect their gameplay. Round based system (1-5) Timed. Various enemies (3 variations including Ai to attack player, health, speed, attack animations, movement animations). Unreal fps basic mechanics (Weapon, Jump, Pickup). Time exchange Player is able to use time as a currency that they've accumulated for enemies . Creates user choice in saving or spending. Player health Player can visualize their hp. Week 2 cont. Made the powerpoint for each week Weekly prototype gameplay video Work Log: Week 2 cont. Defined every core mechanic design for PPT 12 hours of scripting all of the mechanics Listed research questions designed Core mechanic iterations Mechanic gameplay flowchart Started and shared a drive and all documents for this week Week 3 Made the powerpoint for each week Weekly prototype gameplay video Designed Core mechanic iterations 10 hours of scripting all of the mechanics iterations Listed research questions Started and shared all documents for this week Week 3 cont. Work Log: Week 4 Made the powerpoint for each week Weekly prototype gameplay video Designed Core mechanic iterations 5 hours of scripting all of the mechanics iterations Listed research questions Started and shared all documents for this week Created entire postmortem Week 4 cont. Work Log:
