Core Competency Evaluation: System Design

Airron Kennedy

Summary of Core Gameplay Systems: "Rakshasa: The Call of Hanuman" features an array of core mechanic systems that come together to create an action-adventure experience. The game revolves around the heroic journey of the player character, who wields the mighty gada (mace) and possesses extraordinary abilities. Movement System: The player controls the character's movement using a virtual joystick, which can be customized to be on the right or left side of the screen. Combat System: The combat system includes melee attacks using the gada as the primary weapon. The player can perform different melee attacks to defeat enemies. The combat also incorporates special abilities that can be unlocked, such as growing or shrinking (Kama-rupin), super strength (Mahabala), and mystical leap (Vira). These special abilities can be activated using dedicated buttons placed in an arc toward the center of the screen. Puzzle Solving System: The game features sliding puzzles that the player needs to solve to progress. When solving these puzzles, the perspective switches to a first-person view. Interaction System: The player can interact with various objects in the game world, including environmental elements, puzzle components, and NPCs. The contextual action button (C.A.B.) allows the player to perform interactions, such as picking up items or activating switches. Conversation System: The player can engage in conversations with key NPCs. This system allows for dialogue interactions, providing additional story information, quest objectives, and character development. Exploration System: The game encourages exploration of the temple complex and its surroundings. The player can navigate different areas, including courtyards, halls, and shrines, to discover secrets, collectibles, and progress through the game. Collection System: The player can collect relics that have been stolen from the statue of Hanuman. These relics serve as a progression mechanic, unlocking new powers and abilities as they are recovered. Healing System: The player can restore their health by standing in the glow of a lit diya (clay lamp) within the game world. Progression System: The player's progression is measured by completing sub-goals, such as unlocking the abilities of Hanuman, relighting all the clay diya, and defeating each level boss. Progression is also tied to character level, which increases as the player gains experience by defeating enemies. Win/Loss Conditions: The primary objective is to save the player's family and stop the rise of the Rakshasa. The game is won by unlocking all the abilities of Hanuman and defeating the final boss. If the player's health drops to zero, they are reset to the last lit diya, ensuring there is no hard game over. Additionally, the player can achieve different endings based on the percentage of clay diya they have lit throughout the game. The game includes auto checkpoints that reset the player to the last lit diya if their health drops to zero. This allows the player to continue their progress from a specific point. Equipment and Upgrade System: The player character has a set of equipment, including armor and weapons. These can be upgraded by looting slain enemies, with different tiers of loot dropping, such as common, rare, epic, legendary, and unique. Upgrading equipment increases the character's health and damage reduction. Loot System: Enemies drop loot upon death, which falls into different tiers of rarity. The player can continuously kill respawning enemies to acquire better loot and upgrade their equipment. Experience and Leveling System: The player character gains experience by defeating enemies, allowing them to level up. Leveling up increases the character's power and unlocks new abilities. Consumable Items: Enemies drop items that provide temporary buffs to the character. These items can be activated to apply damage increase, damage reduction, or loot drop rate increase buffs for a limited amount of time. The character can stack up to two instances of each buff type.

Weapons are specifically designed to increase the player's damage output. Each weapon in the different sets provides a percentage-based damage boost. For example, the Common Set includes the Iron Dagger, which increases the player's damage by 5%. As players progress through the rarity tiers, they can find more powerful weapons with higher damage bonuses, such as the Unique Set's Soulrender Blade, which provides a significant 25% damage boost.

Similarly, the armor sets focus on increasing the player's defense. The chest pieces in each set provide a percentage-based defense boost. For instance, the Common Set's Leather Chestpiece increases the player's

defense by 5%. As players discover rarer sets, they can obtain chest pieces with higher defense bonuses, like the Unique Set's Shadow Veil, which grants a substantial 25% defense boost.

Example weapon sets:

Common Set:

Weapon: Iron Dagger Damage Boost: +5% Armor: Leather Chestpiece Defense Boost: +5% Drop Rate: 45%

Rare Set:

Weapon: Steel Longsword Damage Boost: +10% Armor: Reinforced Chainmail Defense Boost: +10% Drop Rate: 25%

Epic Set:

Weapon: Mithril Warhammer Damage Boost: +15% Armor: Enchanted Plate Armor Defense Boost: +15% Drop Rate: 10%

Legendary Set:

Weapon: Dragonfire Bow Damage Boost: +20% Armor: Celestial Robes Defense Boost: +20% Drop Rate: 4%

Unique Set:

Weapon: Soul Blade Damage Boost: +25% Armor: Shadow Veil Defense Boost: +25% Drop Rate: 1%

Combat systems, formulas, and communication systems:

Damage Calculation: The damage dealt by the player character can be calculated using the following:

Damage = Base Damage + Weapon Damage + Buff Damage

Base Damage: The inherent damage value of the player character's melee attacks. Weapon Damage: Additional damage provided by the equipped weapon. Buff Damage: Damage bonus from activated buffs or special abilities.

Damage Reduction: The player character may have damage reduction from equipped armor or buffs.

Damage Reduction = Base Damage Reduction + Armor Damage Reduction + Buff Damage Reduction

Base Damage Reduction: The inherent damage reduction value of the player character. Armor Damage Reduction: Additional damage reduction is provided by the equipped armor. Buff Damage Reduction: Damage reduction bonus from activated buffs.

Communication Systems:

HUD UI Elements: The heads-up display (HUD) includes several UI elements to convey important information to the player during combat: Health Bar: Displays the player character's current health level. Clay Diya Counter: Shows the number of clay diya lit out of the total diya in the level. Mini Map: Provides a small map showing nearby rooms and the player's location. Specials Buttons: Buttons for activating special abilities, placed around the Contextual Action Button (C.A.B.). Boss HP Bar: Displays the health of boss enemies during battles.

set of example combat scenarios given different stats:

Rakshasa Grunt 3 vs player (Level 5)

Scenario: Iron Dagger + Leather Chestpiece, No Buffs

Player Stats:

Health: 1,467 Attack Power: 153 Defense: 77 Combat:

Player attacks Rakshasa Grunt 3: Player deals 76 damage to Rakshasa Grunt 3. Rakshasa Grunt 3 attacks Player: Rakshasa Grunt 3 deals 52 damage to Player.

Scenario: Iron Dagger + Leather Chestpiece, Two Buffs (Damage Increase + Damage Reduction)

Player Stats:

Health: 1,467 Attack Power: 153 Defense: 77 Buffs:

Damage Increase Buff: +10% damage (stacked additively) Damage Reduction Buff: +5% damage reduction (stacked additively) Combat Sequence:

The player attacks Rakshasa Grunt 3: The player deals 84 damage to Rakshasa Grunt 3 (10% damage increase). Rakshasa Grunt 3 attacks Player: Rakshasa Grunt 3 deals 49 damage to the Player (5% damage reduction).

Scenario: Iron Dagger + Leather Chestpiece, Two Buffs (x2Damage Increase + x2Damage Reduction)

Player Stats:

Health: 1,467 Attack Power: 153 Defense: 77

Buffs:

Damage Increase Buff: +10% damage (stacked additively) Damage Reduction Buff: +5% damage reduction (stacked additively) Combat Sequence:

Player attacks Rakshasa Grunt 3:

Player's damage with buffs: 153 * (1 + 0.10 + 0.10) = 184 Rakshasa Grunt 3 takes 184 damage. Rakshasa Grunt 3 attacks Player:

Rakshasa Grunt 3's damage: 52 (43 + (43 * 0.2)) Player's damage reduction with buffs: 52 * (1 - 0.05 - 0.05) = 49 The player takes 49 damage.

Scenario: Iron Dagger + Leather Chestpiece, Single Damage Increase Buff

Player Stats:

Health: 1,467 Attack Power: 153 Defense: 77 Buff:

Damage Increase Buff: +10% damage

Combat Sequence:

The player attacks Rakshasa Grunt 3: The player deals 84 damage to Rakshasa Grunt 3 (10% damage increase). Rakshasa Grunt 3 attacks Player: Rakshasa Grunt 3 deals 52 damage to the Player.

Scenario: No Equipment, No Buffs

Player Stats:

Health: 1,467 Attack Power: 146 Defense: 73 Combat Sequence:

The player attacks Rakshasa Grunt 3: The player deals 73 damage to Rakshasa Grunt 3. Rakshasa Grunt 3 attacks Player: Rakshasa Grunt 3 deals 52 damage to the Player.

Consumable Buff data/stats

Damage Increase Buff: Each stack of this buff provides a +10% increase to the player's damage output. Duration: 60 seconds per stack Damage Reduction Buff: Each stack of this buff grants a +5% reduction in damage received by the player. Duration: 45 seconds per stack Loot Drop Rate Buff: Each stack of this buff increases the drop rate of valuable items by +20% Duration: 30 seconds per stack

Buff Drop Rate: 10% (Per enemy slain) Loot Drops: Loot is dropped by respawning enemies.

HUD (10 points): Health bar: Display the player's current health levels using colored bars. These bars visually represent the remaining amount of health the player has. Ability Icons: Show icons representing the player's available abilities or skills. These icons can be placed along the side of the screen, indicating which abilities are ready to use. Cooldown timers are displayed over the icons to show when the abilities will be available again. Buffs and Debuffs: Show active buffs or debuffs affecting the player, such as increased damage, status effects, or temporary enhancements. Player Level and Experience Bar: Show the player's current level and an experience bar indicating their progress towards the next level. Objective Tracker: Show current quests, objectives, and their progress. This can be displayed as a list or a tracker on the screen, indicating the player's current goals and what needs to be accomplished. Google Drawings

New System Addition (10 points):

New System: Mastery System

Description:

The Mastery System is designed to enhance the feeling of progression within and between levels by allowing players to earn mastery points and unlock powerful bonuses and rewards. It provides an additional layer of character development and customization, giving players a sense of growth and accomplishment.

Mastery Points:

Players earn Mastery Points by completing in-game objectives and reaching milestones. Each objective or milestone rewards a specific amount of Mastery Points.

Mastery Tree:

The Mastery Tree consists of multiple levels, with each level representing a different tier of mastery. Each level has a specific number of Mastery Points required to unlock it.

Mastery Paths:

The Mastery Tree offers different paths, representing various aspects of character development and customization. Each path provides unique bonuses and abilities.

Mastery Levels and Bonuses:

Each level within a path unlocks a specific bonus or ability. The bonuses can include increased damage, improved defense, and additional loot chance.

Branching Paths:

The Mastery Tree branches into different paths, allowing players to choose their desired specialization. Each path offers a distinct playstyle and bonuses tailored to that specialization.

Reset Option:

Players have the option to reset their Mastery Points allocation and redistribute them among different paths and levels.

Data:

Mastery Points:

Objective 1: Defeat a challenging boss - Reward: 1 Mastery Point Objective 2: Defeat a challenging boss - Reward: 1 Mastery Point Objective 3: Defeat a challenging boss - Reward: 1 Mastery Point Objective 4: Defeat a challenging boss - Reward: 1 Mastery Point Objective 5: Defeat 50 Rakshasa Grunt 1 - Reward: 1 Mastery Point Objective 6: Defeat 100 Rakshasa Grunt 1 - Reward: 1 Mastery Point Objective 7: Defeat 150 Rakshasa Grunt 1 - Reward: 1 Mastery Point Objective 8: Defeat 200 Rakshasa Grunt 1 - Reward: 1 Mastery Point Objective 9: Defeat 50 Rakshasa Grunt 2 - Reward: 1 Mastery Point Objective 10: Defeat 100 Rakshasa Grunt 2 - Reward: 1 Mastery Point Objective 11:Defeat 150 Rakshasa Grunt 2 - Reward: 1 Mastery Point Objective 12: Defeat 200 Rakshasa Grunt 2 - Reward: 1 Mastery Point Objective 13: Defeat 50 Rakshasa Grunt 3 - Reward: 1 Mastery Point Objective 14: Defeat 100 Rakshasa Grunt 3 - Reward: 1 Mastery Point Objective 15: Defeat 150 Rakshasa Grunt 3 - Reward: 1 Mastery Point Objective 16: Defeat 200 Rakshasa Grunt 3 - Reward: 1 Mastery Point Objective 17: Defeat 50 Rakshasa Grunt 4 - Reward: 1 Mastery Point Objective 18: Defeat 100 Rakshasa Grunt 4 - Reward: 1 Mastery Point Objective 19: Defeat 150 Rakshasa Grunt 4 - Reward: 1 Mastery Point Objective 20: Defeat 200 Rakshasa Grunt 4 - Reward: 1 Mastery Point Milestone 1: Reach Level 5 - Reward: 1 Mastery Point Milestone 2: Reach Level 10 - Reward: 1 Mastery Point Milestone 3: unlock all abilities - Reward: 1 Mastery Point Milestone 4: die 30 times - 1 Mastery Point

Mastery Tree:

Path 1: "Path of the Warrior" (Combat specialization) Level 1: "Mighty Strikes" - Increases melee damage by 5% (Cost: 4 Mastery Points) Level 2: "Bulwark" - Increases defense by 10% (Cost: 4 Mastery Points)

Path 2: "Path of the Guardian" (Defense specialization) Level 1: "Ironclad" - Increases overall defense by 5% (Cost: 4 Mastery Points) Level 2: "Defensive Stance" - Reduces incoming damage by 10% (Cost: 4 Mastery Points)

Path 3: "Path of the Craftsman" (loot specialization) Level 1: "Artisan's Eye" - Increases chances of finding high-quality items by 10% (Cost: 4 Mastery Points) Level 2: "Master Gatherer" - Increases chances of finding high-quality items by 20% (Cost: 4 Mastery Points)

Players can choose to invest their Mastery Points in one or multiple paths, allowing for diverse character gear customization.

B.

Unique gear is obtained by defeating Rakshasa Grunt 4 at a rate of 5% (Rakshasa Grunt 4: Common (40%), Rare (30%), Epic (15%), Legendary (10%), Unique (5%))

Given that the player has no buffs, on average it would take 20 enemies to receive a drop When the player has 1 loot buff that chance is increased to 6% (Rakshasa Grunt 4: Common (40% * 1.2 = 48%), Rare (30% * 1.2 = 36%), Epic (15% * 1.2 = 18%), Legendary (10% * 1.2 = 12%), Unique (5% * 1.2 = 6%))

And finally, when the player has 2 active loot buffs, the chance is increased again to 7.2% Rakshasa Grunt 4: Common (40% * 1.2 * 1.2 = 57.6%), Rare (30% * 1.2 * 1.2 = 43.2%), Epic (15% * 1.2 * 1.2 = 21.6%), Legendary (10% * 1.2 * 1.2 = 14.4%), Unique (5% * 1.2 * 1.2 = 7.2%)
