UNO

By *Airron Kennedy*

All vs. All Card Game
for 2-10 Players
Ages: 7+

Game Description:
Players race to empty their hands and catch opposing players with cards left in theirs, which score points. In turns, players attempt to play a card by matching its color, number, or word to the topmost card on the discard pile. If unable to play, players draw a card from the draw pile, and if still unable to play, they pass their turn. Wild and special cards spice things up a bit.

GRATIS Outline

Goals

- ● The first player to obtain 500 points wins the game.

Rules

Dealing and Starting the Game

1. Every player picks a card.
2. The person who picks the highest number deals.
    a. Action Cards count as zero for this part of the game.
3. Shuffle the cards.
4. Deal each player 7 cards.
5. The first player is normally the player to the left of the dealer and play follows a clockwise direction.
6. The remainder of the deck is placed face down to form a Draw pile.
7. The top of the Draw pile is turned over to begin a Discard pile
    a. If the first card turned up from the Draw Pile (to form the Discard Pile) is an Action card, the Action from that card applies and must be carried out.
    b. The exceptions are if the Wild or Wild Draw Four cards are turned up, in which case – Return them to the Draw Pile, shuffle them, and turn over a new card.
8. At any time, if the Draw Pile becomes depleted and no one has yet won the round, take the Discard Pile, shuffle it, and turn it over to regenerate a new Draw Pile.

Player Actions

1. Every player views his/her cards and tries to match the card in the Discard Pile.
    a. You have to match either by the number, color, or the symbol/Action.
    b. You can also play a Wild card (which can alter current color in play).
2. If the player has no matches or they choose not to play any of their cards even though they might
3. have a match, they must draw a card from the Draw pile.
4. If that card can be played, play it. Otherwise, the game moves on to the next person in turn. You can also play a Wild card, or a Wild Draw Four card on your turn.
5. After a card is drawn, the player can discard it if it is a match, or if not, play passes on to the next player.

Scoring and Victory Conditions

1. The game continues until a player has one card left.
2. The moment a player has just one card they must yell "**UNO**!".
    a. If they are caught not saying "Uno" by another player before any card has been played by other players, the player must draw two new cards.
    b. Assuming that the player is unable to play/discard their last card and needs to draw, but after drawing, is then able to play/discard that penultimate card, the player has to repeat the action of calling out "Uno".
    c. The bottom line is – Announcing "Uno" needs to be repeated every time you are left with one card.
3. Once a player has no cards remaining, the game round is over, points are scored, and the game begins over again.

4. First to 500 points wins the game.
    a. The first player to get rid of his/her cards receives points for the cards left in opponents' hands as follows:
        i. All number cards (0-9).....Face Value
        ii. Draw Two.....20 points
        iii. Reverse.....20 points
        iv. Skip.....20 points
        v. Wild.....20 points
        vi. Wild Draw Four.....20 points

Items

- 108 cards

Setup

- Unpack deck of cards.
- Shuffle deck of cards
- Deal each player 7 cards
- Place discard pile
- Reveal beginning card
- Decide who goes first
- Start Game

Meaningful Choices in UNO

Determining Meaningful Choices

1. Choosing between a Matching Number, Color or Symbol

- The player may have a matching color, number and symbol in their hand all at once. They must choose between which one (if any) to play.
    - This is meaningful because the player may want to hold on to a certain color, number or action depending on the other cards in their hand and the cards of their opponents.
    - This choice occurs whenever a player has 2 or more cards in their hand that matches the current top of the discard pile. This may be multiple numbers, colors, or symbols.

2. Choose Not to Play a Card

- The player may have an available play, but chooses instead not to play their card and draw from the pile.
    - This is meaningful because the player may know what colors their opponents are holding on to. They may purposefully not play a specific number or color. The player may also want to hold onto their action cards until a more opportune time.
    - This choice occurs each turn.

3. Choosing a Color when a Wild Card is played

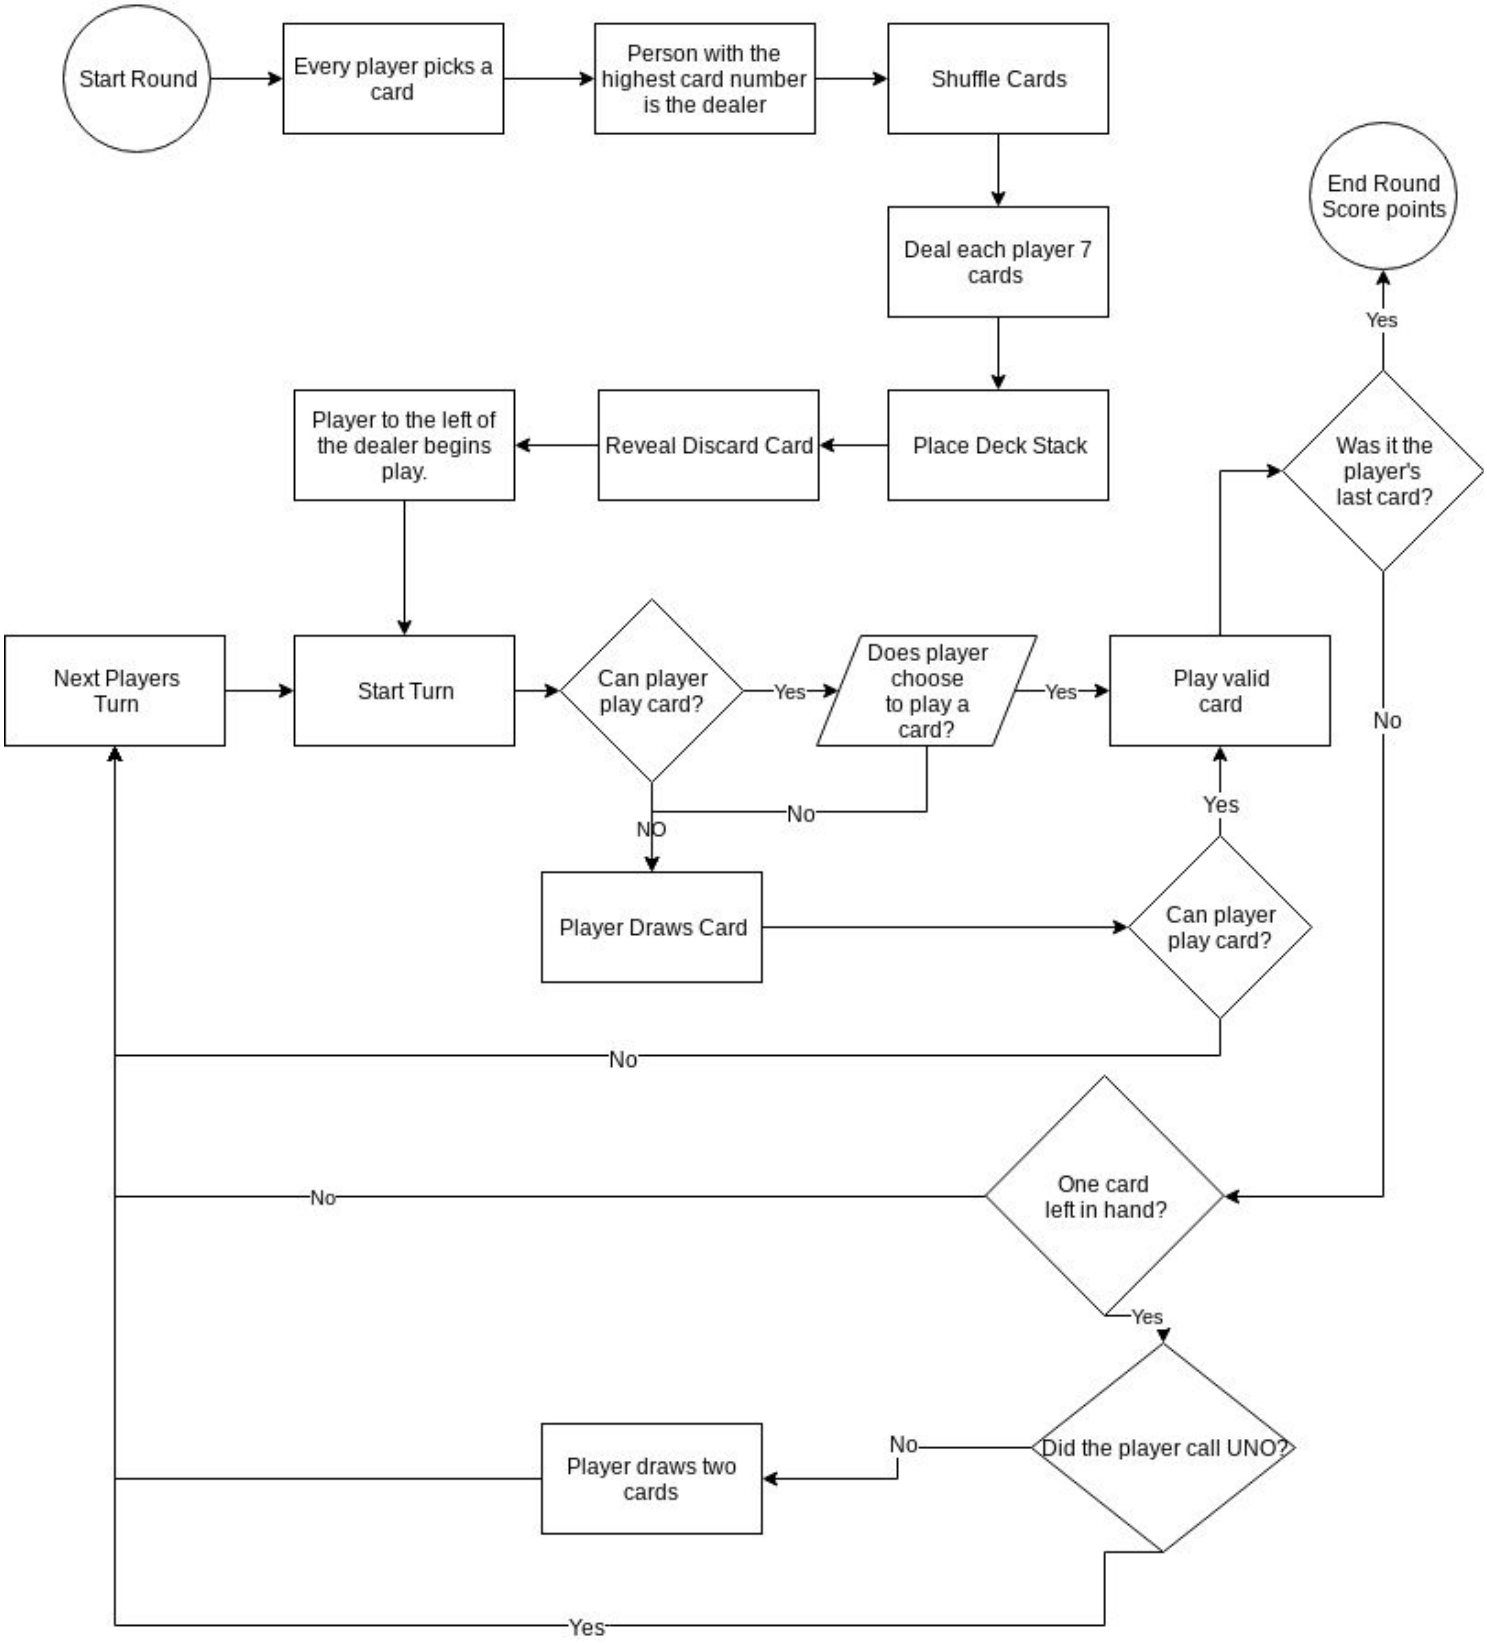

- When a wild card is played and the player has a choice to name the next color that must be followed.
    - This is meaningful because the player can choose between any of the four colors. They can set themselves up for their next turn by choosing a color they have in abundance.
    - This choice occurs whenever a wild card is played.

Explanation (answer in at least **one paragraph**)

Choose one of the Meaningful Choices listed above. How does that Meaningful Choice impact UNO? How does it improve the gameplay? What would the gameplay be like without that choice?

Choosing between a matching number, color or symbol is a crucial mechanic in the game of UNO because it improves gameplay by provides players with a chance to create a strategy based on their own decisions. Without the mechanic of choosing the cards you want to play, it makes the game seem boring and like you have no choice in how the game is played. This meaningful choice can impact the result of other players as it gives you the chance to stall the leading player if you're aware of what cards they may have left. Using this mechanic wisely can save you the game but on the other side, using unwisely can cost you the game.

Flowchart

Start Round
Every player picks a card
Person with the highest card number is the dealer
Shuffle Cards
Deal each player 7 cards
